

NOAA Integrated Calibration and Validation System (ICVS) Alerts, Events, and Monitoring

Ninghai Sun, Xin Jin, Jason Choi, Ellen Liang, Wanchun Chen,
Fuzhong Weng

NOAA/NESDIS/STAR

Outline

- **Introduction to STAR ICVS**
 - Objectives
 - Services
 - IT Infrastructure
 - Processing Flowchart
- **Major Accomplishments**
 - New Trending Products
 - Improvements of Existing Products
 - Useful Near Real Time Anomaly Alert
- **Summary & Future Plans**
 - ICVS improvement and implementation plan
 - JPSS Readiness

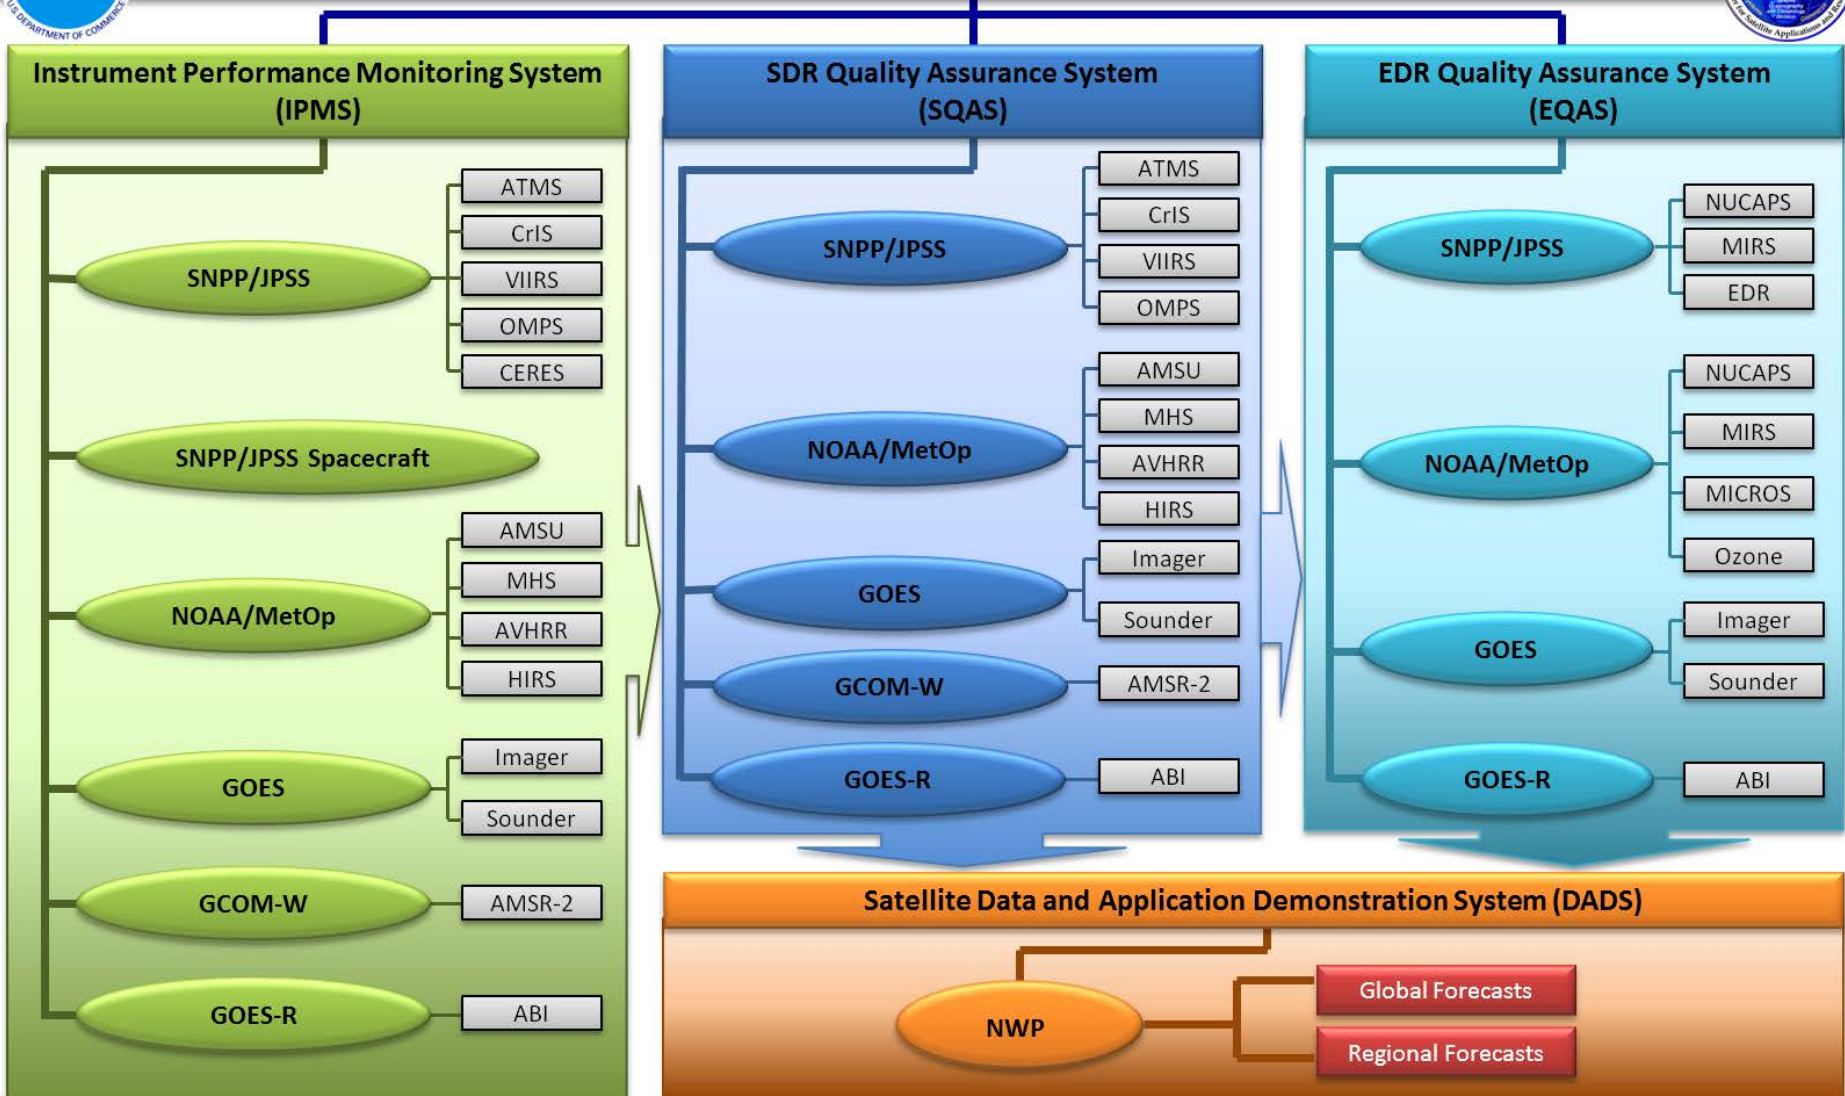

Benefits of STAR ICVS System

- Provide near real time and long term spacecraft and instrument health status and performance monitoring
- Provide near real time and long term SDR/EDR data product quality monitoring
- Provide real time support for sensor calibration activities and instrument anomaly troubleshooting
- Provide quick and preliminary estimate of satellite data impact in NWP applications
- Ensure the integrity of the climate data records from broader satellite instruments

NOAA/NESDIS/STAR Integrated Cal/Val System (ICVS)

Services

- NOAA ICVS provides the following services
 - Monitors over 400 parameters for 28 instruments onboard NOAA/METOP/SNPP satellites
 - Monitors and trends the SNPP spacecraft parameters , supporting NASA flight team
 - Monitors the instrument performance through trending the instrument house-keeping and telemetry parameters
 - Detects the anomaly events and automatically sends the warning messages to NOAA satellite operators, NASA instrument scientists, and senior program managers
 - Characterizes the sounder SDR data quality with respect to the numerical weather prediction model (NWP) simulations
 - Provides NWP users and remote sensing communities on the instrument noises for their real-time applications (e.g. error covariance in data assimilation)
 - Generates high resolution geostationary/polar-orbiting satellite images
 - 4246 all instrument status and data quality trending figures generated in near real time
 - Supports Suomi NPP life cycle reprocessing by operating SDR processing packages

STAR ICVS IT Infrastructure

STAR Internal Servers

- STAR integrated calibration/validation system (ICVS)
- Global Space-based Inter-Calibration System (GSICS)
- Daily JPSS SDR calibration/validation activities

Server	Cores	Memory (GB)	Storage (TB)
STAR-S1	80	256	135
STAR-S2	80	512	230
STAR-S3	80	512	200
STAR-S4	16	256	12
STAR-S5	16	256	12
STAR-S6	8	16	8
STAR-S7	4	4	2
STAR-S8	16	768	20
STAR-S9	16	768	20

STAR CICS Cluster

- Computation intensive jobs
- NWP pre-operational testing
- Mission lifecycle data reprocess

Server	Cores	Memory (GB)	Storage (TB)
STAR-CICS1	432	1296	136

Parts	Total
Servers	12
CPU Cores	876
Memory (GB)	5156
HDD (TB)	815

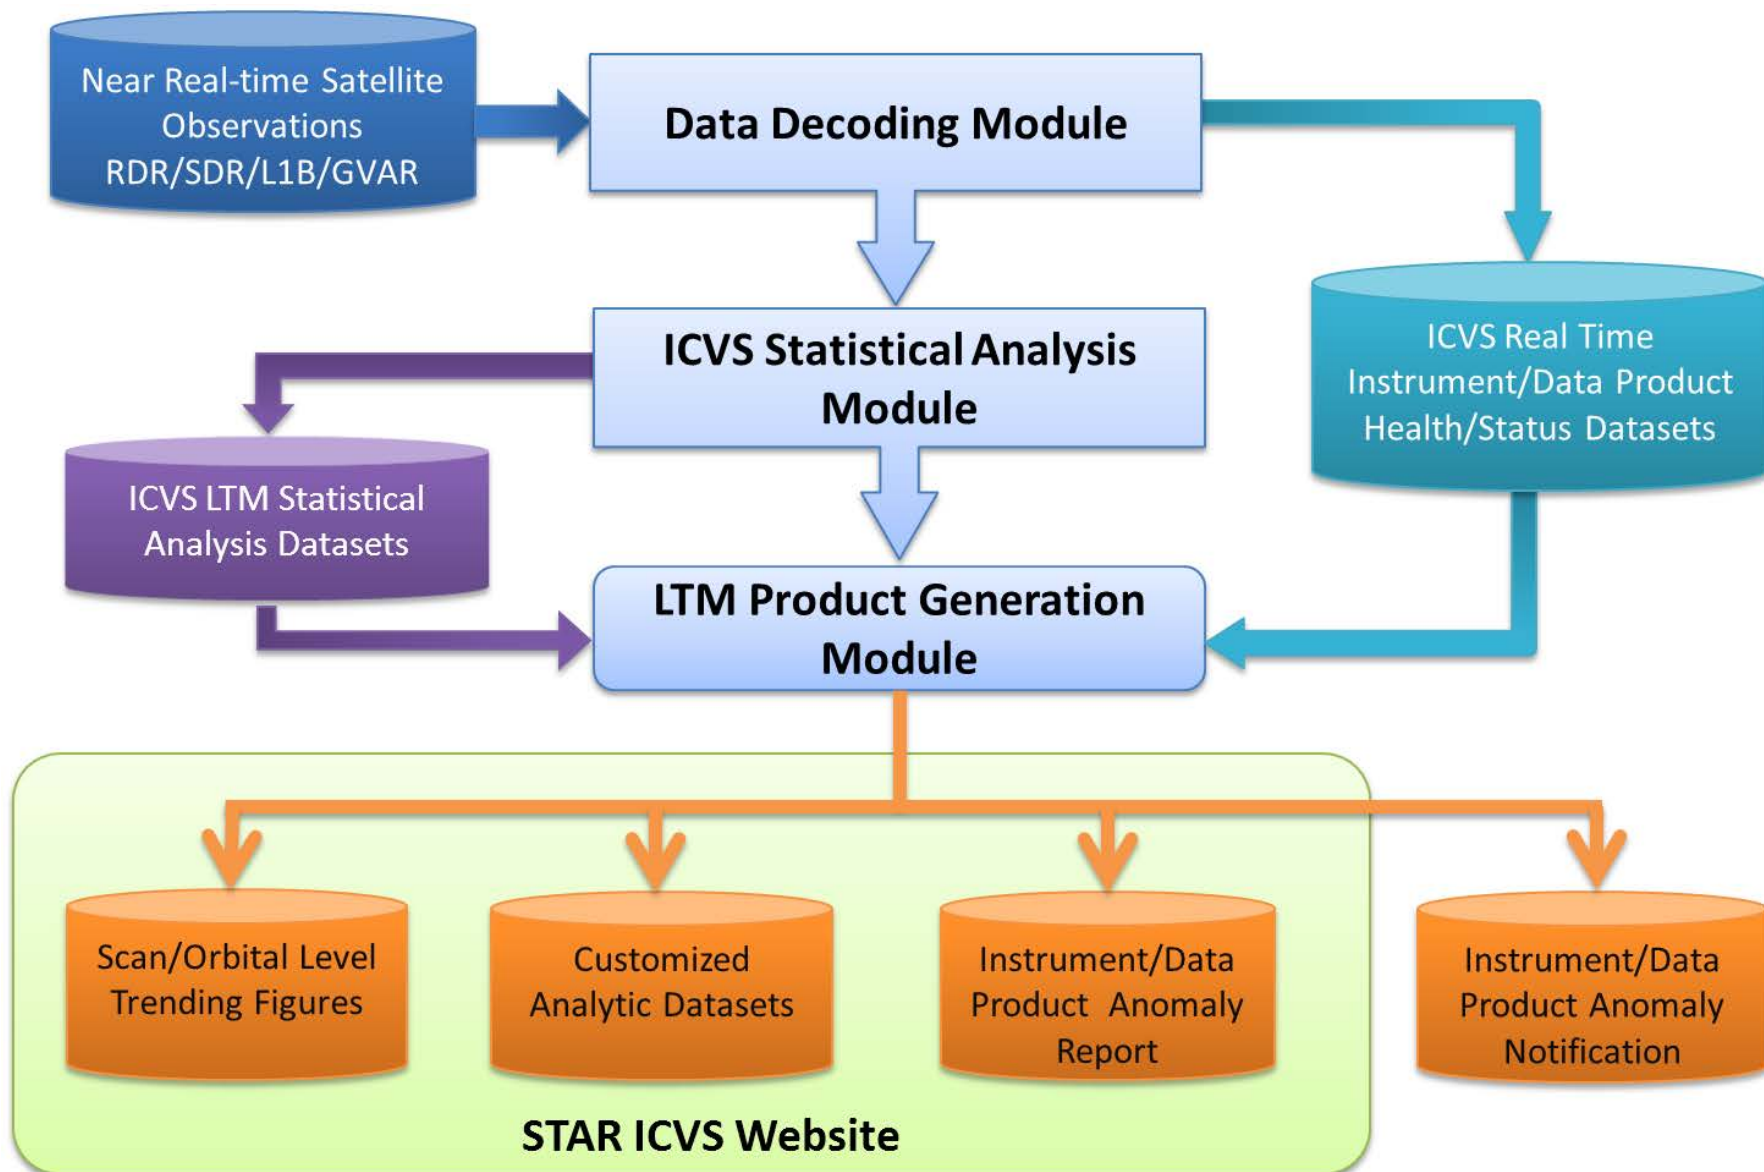

UMD/AOSC Servers

- Data dissemination
- Academia research testing

Server	Cores	Memory (GB)	Storage (TB)
STAR-UMD1	64	256	20
STAR-UMD2	64	256	20

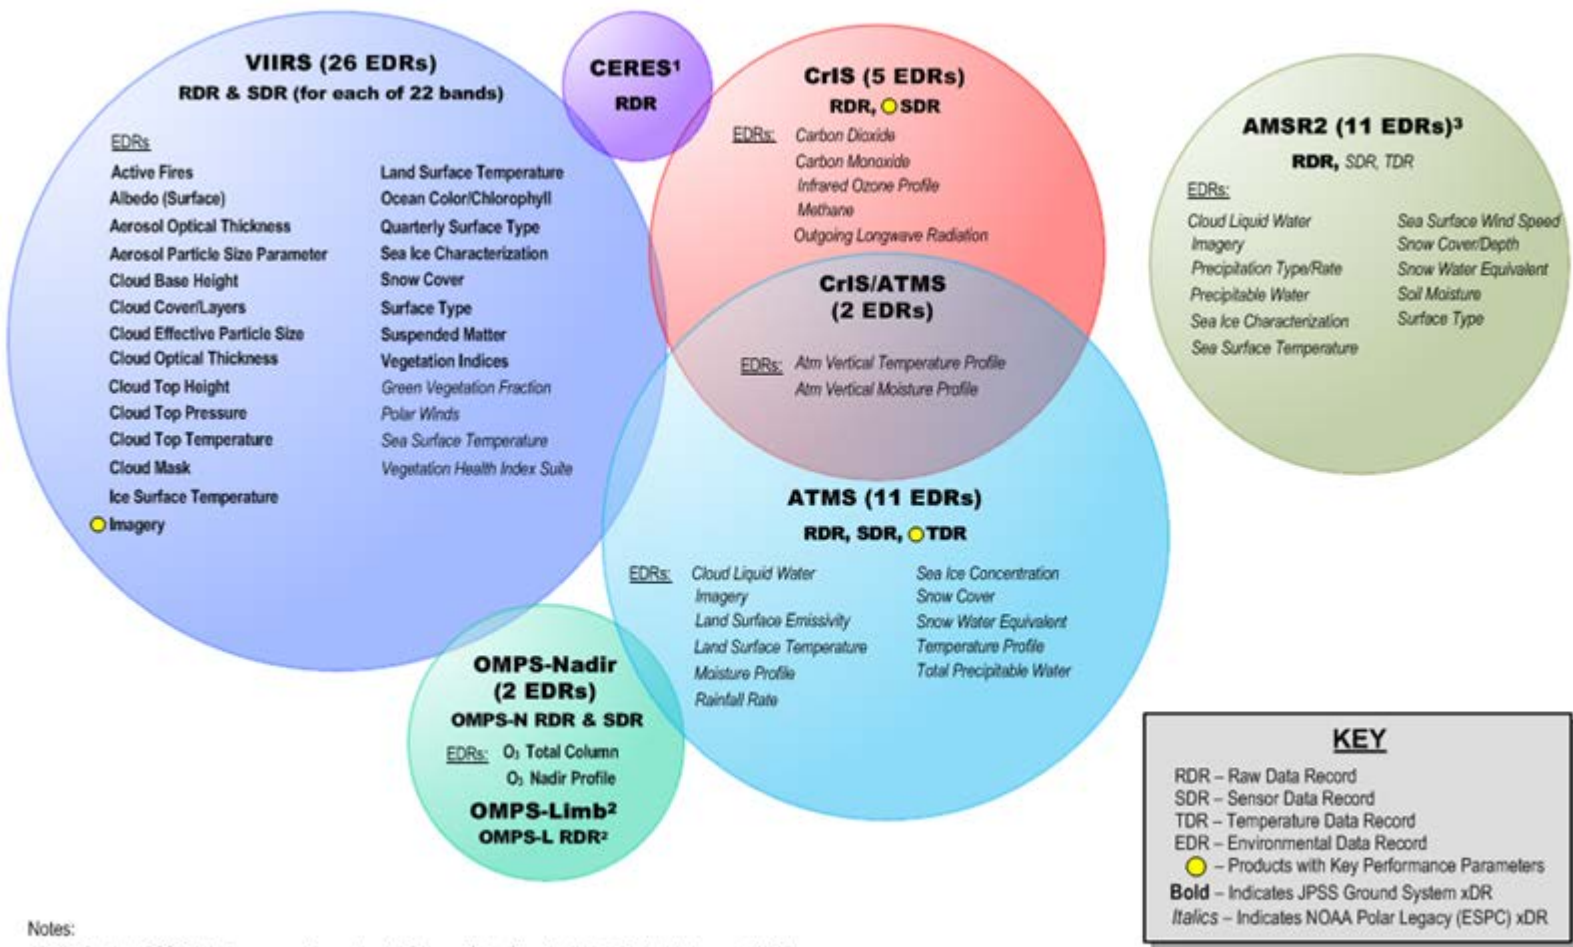

STAR ICVS Data Processing Flowchart

JPSS Data Products

JPSS Program Data Products

Notes:

¹RDRs for the JPSS-2 Mission are contingent on NASA manifest of the Radiation Budget Instrument (RBI)

²Not applicable to JPSS-1; contingent on NASA manifest of OMPS-Limb on the JPSS-2 Mission

³Dependent on the Global Change Observation Mission (GCOM) provided by the Japan Aerospace Exploration Agency

The JPSS Program includes Ground System Support for the Metop, DMSP, and GCOM missions

Event	Date	Time (UTC)	End (UTC)	Instrument (s)	Retrieved from:	CCR	Notes
VIIRS DNB Calibration	08/02/16	1:52	17:06	V	C/V Leads Archive	---	---
ATMS Table and RAM Dumps	08/02/16	16:59	17:02	A	ESPC Ops Report	---	During SVL Contact 24691 SNPP engineers placed the ATMS instrument in safe mode to perform required ATMS table dumps. While in safe mode no science data was generated resulting in a 2 minute, 40 second ATMS outage.
ATMS Once-per-Orbit Scan Reversals Implemented	07/25/16	--	--	A	Go-CAM Report, C/V Leads Archive	---	Svalbard Contact 24577, Ground commanded CBM-sequence until 08/04/16, then DAS-commanded at 70N, 75N, 80N, repeat. Expect 14 reversals/day.
ATMS TMon 131 and 132 Activated	07/18/16	--	--	A	C/V Leads Archive	---	---
ATMS TMon 131 and 132 Load	07/15/16	19:21	--	A	Go-CAM Report, C/V Leads Archive	---	On Friday, 15 July 2016, during contact 24437 at 19:21 UTC, OSPO loaded two new TMons (131 & 132) and one new ACBM sequence (100) to ATMS to monitor ATMS Main Motor temperature and DTU-measured ATMS Scan Drive Mechanism temperature. If either temperature exceeds 60C for 24 seconds or 10 seconds, respectively, ATMS will automatically be commanded to safe mode.
J2000 to TOD Update (Table 58)	07/14/16	--	--	ACOV	NPP ATR	---	---
VIIRS DNB Calibration	07/04/16	0:56	16:10	V	C/V Leads Archive	---	---
OMPS High Resolution Data Collection Discontinued	07/02/16	0:00	--	O	---	---	The measurement activities of the S-NPP/OMPS instruments will discontinue the High-Resolution Ozone observations that are solely collected by the NTC/NM instrument on Saturdays. The High-Resolution Ozone observations will be replaced with routine EV data that are typically collected throughout the week.
Star Tracker Lunar Intrusion Test	06/17/16	0:00	19:58	---	Go-CAM Report, C/V Leads	---	---

- **STAR ICVS-LTM system uses the following equation to calculation S-NPP ATMS channel sensitivity (NE Δ T)**

$$Adev_{ch} = \left[\frac{1}{2(M-1)N} \sum_{i=1}^{M-1} \sum_{j=1}^N \left(\frac{C(i+1, j) - C(i, j)}{G_{ch}(i)} \right)^2 \right]^{1/2}$$

Where,

M is the number of scans for orbital NE Δ T calculation

N is the number of warm count readings used in calculation

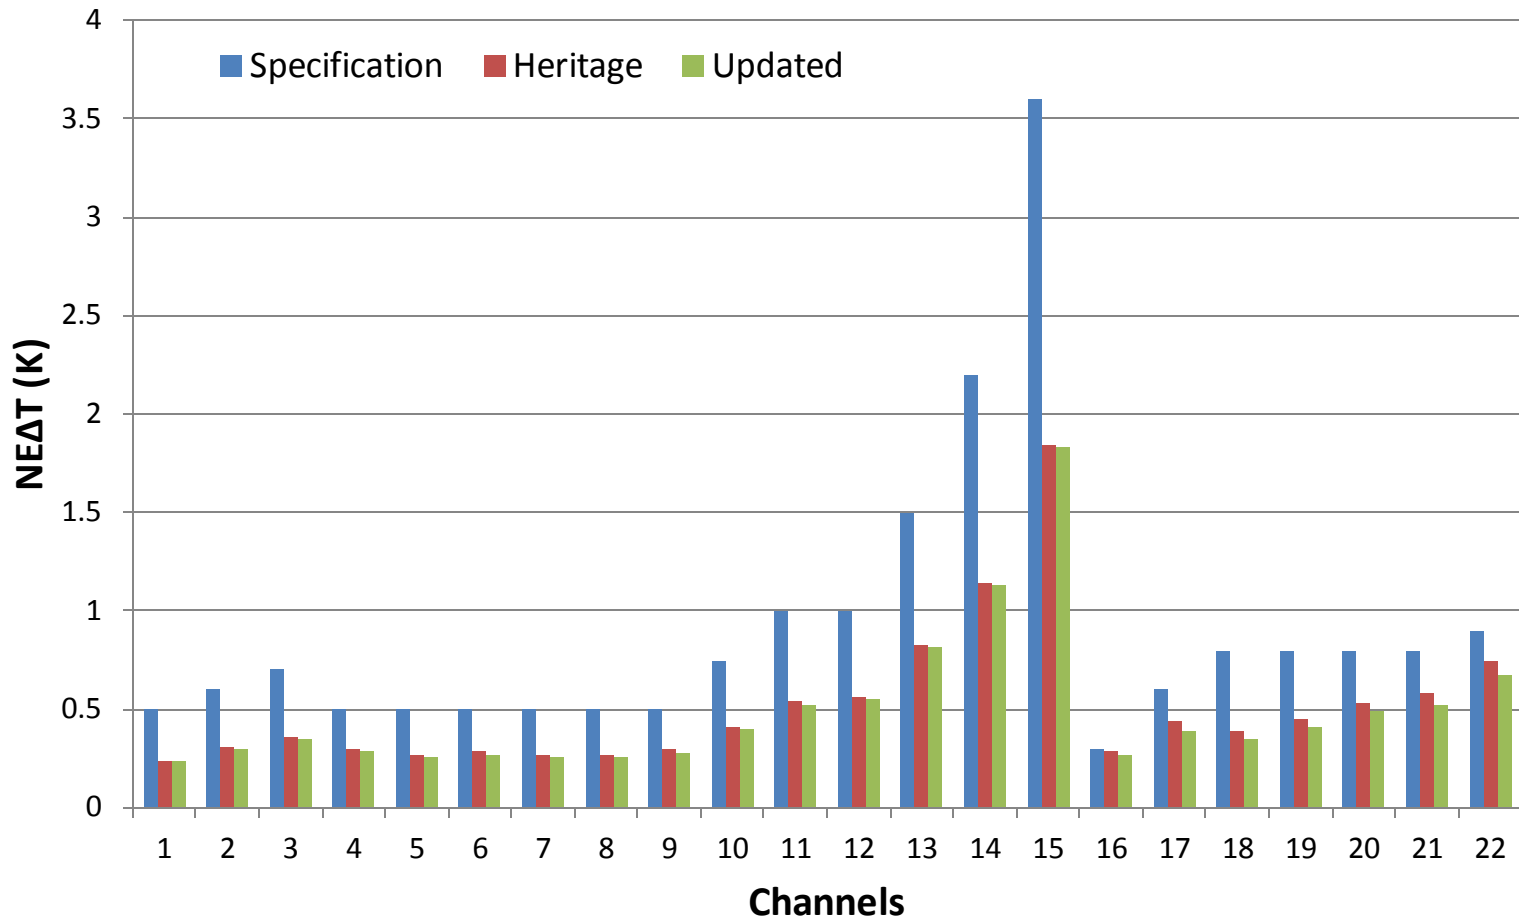

C is the warm count readings for each scan

G is the calibration gain of each scan

Summary & Future Plan

- STAR ICVS is not only just instrument status monitoring system but also a calibration testing and quality evaluation testbed
- STAR ICVS keeps providing near real time and long term trending of NOAA instrument and automatically sending warning messages when anomaly is detected
- STAR ICVS will keep supporting NESDIS 24/7 operational missions
- New functions and parameters are being added to ICVS to provide users better understanding of NOAA satellites/instruments operational status and support on calibration activities, as well as improving user experience by updating STAR ICVS website
- STAR ICVS has supported JPSS-1 pre-launch calibration activities and is ready for JPSS-1 post-launch instrument monitoring and calibration activities
